

UFLI Foundations Unit Assessments: Fluency Checks

In response to requests from teachers and schools, UFLI is developing unit assessments to provide an overall picture of each student's reading development. The first of these assessments we have ready to pilot is the Fluency Check. As you use this pilot version, we welcome your [feedback](#).

Fluency is a key indicator of reading proficiency and the goal of foundational reading skills instruction. Fluency can be defined as accuracy, automaticity at both the word and text levels, and prosody. A dedicated fluency assessment passage is provided for each unit in the first and second grade scope and sequence to measure text-level automaticity. The fluency check passages are designed to measure oral reading fluency (ORF) using decodable passages that include concepts the student has learned so far. These can be used to track student progress and plan small group support.

Administration & Scoring. Fluency checks are intended to be used as a one-minute timing of student oral reading. They are administered individually. Each fluency check includes a teacher form and student form. Read the teacher form for administration and scoring directions.

Interpreting Scores. After completing the fluency check, the teacher will calculate how many words the student read correctly in the one-minute timing. This is the student's words correct per minute (WCPM) score. Until we have had the opportunity to develop our own criteria, we recommend using the Hasbrouck and Tindal (2017) ORF norms for first and second grade (see table).

Grade	Percentile	Fall WCPM*	Winter WCPM*	Spring WCPM*
1	90		97	116
	75		59	91
	50		29	60
	25		16	34
	10		9	18
2	90	111	131	148
	75	84	109	124
	50	50	84	100
	25	36	59	72
	10	23	35	43

According to Hasbrouck and Tindal (2017), norms begin in Winter of first grade and the 50th percentile is a measure of average performance. For example, in Spring of 1st grade the 50th percentile, or average, is 60 WCPM. In Spring of 2nd grade, it is 100 WCPM. A score considerably below the 50th percentile indicates the student likely needs additional support.

Using Fluency Data. We recommend using fluency data to inform instructional decisions. We *do not* recommend using fluency scores as grades, and for this reason, we do not provide benchmark or mastery criteria. For information about how to support students in developing their reading fluency, see our [Fluency Support Guide](#).

Hasbrouck, J., & Tindal, G. (2017). *An update to compiled ORF norms* (No. 1702). Technical report.

UFLI Foundations Fluency Check Diphthongs and Silent Letters Lessons 95-98

Directions

Fluency Checks should be conducted at least one week *after* the completion of a unit.

Place the student copy of the passage in front of the student. Point to the passage and say **You are going to read this story out loud. If you come to a word you don't know, I will tell it to you. Keep reading until I tell you to stop. It's okay if you don't read the whole story. Just do your best reading.**

Set a timer for 1 minute. Start the timer when the student begins reading. When you are ready, point to the first word of the first paragraph and say **You will start here** (point). **Please begin reading when you're ready.**

If the student pauses for 3 seconds, give them the word, and mark it as an error. If the student reads no words correctly in the first line, discontinue the assessment.

Draw a slash (/) through each error the student makes.

When 1 minute is up, note the last word the student read with a bracket (]) or line (|).

The Bounce House

My birthday is in February, and I know what I want. I	12
have had my eye on this gift for a long time. I want it	26
with all my heart. Do you want to know what it is?	38
The gift I want more than anything is a bounce house.	49
Yes, that's right, I want a bounce house on the lawn in	61
my backyard. Some people may say I am too old for a	73
bounce house, but I know there is no age limit on fun.	85
The bounce house I want is a round tower. It has	96
clouds on the sides and a crown on the top. The door to	109
get in is small so you need to kneel down and crawl	121
inside.	122
When you are in the bounce house you can shout as	133
loud as you want. You can jump up and down or even	145
do flips. In the bounce house, there is no wrong way to	157
enjoy yourself.	159
I wrote down my birthday wish and shared it with you.	170
Now I hope this wish comes true.	177

Scoring

Calculate the total words correct by subtracting the errors from the total words read.

Total words read _____ **Total errors** _____ **Total words correct** _____

The Bounce House

My birthday is in February, and I know what I want. I have had my eye on this gift for a long time. I want it with all my heart. Do you want to know what it is?

The gift I want more than anything is a bounce house. Yes, that's right, I want a bounce house on the lawn in my backyard. Some people may say I am too old for a bounce house, but I know there is no age limit on fun.

The bounce house I want is a round tower. It has clouds on the sides and a crown on the top. The door to get in is small so you need to kneel down and crawl inside.

When you are in the bounce house you can shout as loud as you want. You can jump up and down or even do flips. In the bounce house, there is no wrong way to enjoy yourself.

I wrote down my birthday wish and shared it with you. Now I hope this wish comes true.
